

## Environmental Health and Safety Review

***NOTE: If this same program already has been approved and there are no material changes, this review will not be required during each course offering or for each student.***

The Environmental Health and Safety (EHS) will review and ensure that the following information has been completed and addressed by the Principal Investigator as part of the approval of this request. This review may include consultation with representatives from the University Laboratory Safety Committee, Office of the Vice Provost for Research or Youth Protection Office.

- 
- Appendix A and B have been completed and checked.
  - Work with any biological agents has been approved by the IBC.
  - The student is added to the appropriate IBC registration.
  - The animal work is approved by the IACUC.
  - The student is added to the IACUC registration.
  - The student completed the required Laboratory Safety Training on the EHS website and the minor's supervisor has completed lab- and task-specific training and documented it on the Laboratory Safety Orientation Checklist.  
[https://www.ehs.harvard.edu/sites/ehs.harvard.edu/files/lab\\_safety\\_orientation\\_checklist\\_1.pdf](https://www.ehs.harvard.edu/sites/ehs.harvard.edu/files/lab_safety_orientation_checklist_1.pdf)
  - The student completed the required Animal Training by the IACUC.
  - The student completed the Agent Specific Training by the Principal Investigator or designee.
  - The laboratory work is performed in a facility that is appropriate to the Biosafety Safety Level of the agent used (CDC/NIH BMBL Biosafety Level Criteria).
  - EHS has performed the scheduled inspections and all findings have been addressed by the lab.
  - The laboratory has a positive history of compliance that reflects the ability to manage, mentor, and monitor minors/students in safe laboratory practices.
